

Career Opportunities with Intel in China

You're brilliant and tech savvy. You have the skills and vision to develop the infrastructure of a technological leader. Put them to work at Intel where we've delivered landmark products to the marketplace for over 30 years. Help shape our future by joining our highly focused teams at the Intel sites in China. It's your chance to influence a company at the heart of technical change.

With facilities in Shanghai, Beijing, Shenzhen and Chengdu, Intel China has a commitment to quality and leading-edge technology. You'll enjoy unparalleled opportunities to work on a wide range of technologies using the latest tools in our state-of-the-art work environments and laboratories.

Each site focuses on a key area: Our Intel Shanghai site is centered around four major operations including manufacturing, labs, software development and sales and marketing. Intel in Beijing is home to our state-of-the-art research center and lab and sales and marketing operations. And, the Intel site in Shenzhen provides world-class support at the OEM, developer and end-user levels. In addition, Intel is constructing a new assembly, testing, and microprocessor packaging facility in Chengdu.

A career at Intel China is an opportunity for you to play an active role in a company with a deep commitment to the growth of the computer industry in China.

We have the following opportunities available:

- Integrated Circuit Engineering
