It was my great honor to serve as the 2003 National Council Chairman of the Chinese Institute of Engineers - USA (CIE/USA). As a national-level engineering professional society in the United States, the CIE/USA is a non-profit professional organization dedicated to promote communications and information exchange among engineers and scientists. Boasting with its 87-year’s glorious history; CIE/USA is the largest Chinese American professional organization in the nation. It has grown to a nationwide organization with members over 10,000. Currently, we have six chapters in the US covering most of the major states.

The function of the National Council is to coordinate and sponsor several annual or bi-annual events in the national level as well as to provide a networking platform among the chapters.

Every odd year, CIE/USA co-sponsors the "Sino-American Technology and Engineering Conference" (SATEC) together with the Chinese government. Due to the SARS in 2003, the originally planned 6th SATEC in 2003 was delayed until April 19-29, 2004. It was a very successful event. 62 Chinese American experts were invited to attend the Conference in China. They were divided into seven technical groups and spent one week to visit various Chinese companies and organizations before getting together in Beijing for a two-day final convention. The reports and recommendations generated from SATEC are highly regarded by the Chinese government officials.

Similarly, CIE/USA has co-sponsored the "Modern Engineering and Technology Seminar" (METS) with Taiwanese government in very even year. During November 12-18, 2004, we will hold the 20th METS in Taipei again. With its 40-year's history, METS has made a tremendous impact to the success of the Taiwan economy, especially in industrial area. We are looking forward to the success of this event.

As a board member of the National Engineering-Week Steering Committee, the CIE/USA has actively participated in several events sponsored by the E-week organization including the "National Engineers Week 2004 Future City Competition." We believe that it is important to create a forum for our industrial and professional organizations to recognize outstanding Asian American contributors. Since 2002, CIE/USA has sponsored the annual "Asian American Engineer of the Year" (AAEOY) award banquet in two consecutive years in Dallas. This year, we have sponsored the 3rd AAEOY banquet in the beautiful San Francisco Bay Area. By recognizing these AAEOY award recipients, we hope to create a source of inspiration for all Asian Americans, in particular, future generations. This historical event has received strong corporate, community, academic and government supports. More than a dozen organizations have sponsored the event, and nearly 600 distinguished guests, honorees, corporate executives and community leaders attended the award banquet. I would also like to thank the award banquet committee co-chaired by Dr. David Fong and Dr. Belle Wei for their dedicated and relentless hard work to bring this event to a big success.

This year, we set up a task force to actively recruit new chapters around the country. Although, the effort did not succeed due to a lack of clear by-laws endorsement, it received full support from the National Council to form another task force to revisit the by-laws in the coming year. I hope that this recruiting effort can resume soon. For healthy growth of this organization, we do need more new chapters to represent all Chinese American engineers around the country.

Finally, I would like to thank all National Council members' support and dedication, especially the wonderful team of 2003 National Council officers (Ted Lee, Su-Syun Chou, and James Lee) to bring our CIE/USA organization to a continuous growth.

Sincerely,

Barry Jia-Fu Lin
2003 Chairman,
CIE/USA National Council
Chinese Institute of Engineers
CIE/USA is a professional non-profit and non-political organization founded in 1917 in New York by a group of talented and forward-looking Chinese engineers who graduated from American colleges and worked in American railroads and various industries. On July 15, 1953 the United States Chapter was reestablished as an independent entity known as CIE-New York. It was formally registered in the state of New York in 1963 as the CIE-New York, Inc. a non-profit engineering organization. In 1977, the institute was renamed as the CIE/USA and its activities engaged members from all parts of the United States. Chinese-American engineers in the US have played a significant role in the rapid growth of technology and communications throughout the United States. In order to coordinate the engineering and scientific professional activities and organizations in the major metropolitan regions in the US, The National Council of CIE/USA was formed on November 8, 1986. The CIE/USA National Council consists of 6 area chapters: the greater New York Metropolitan Area, San Francisco Bay Area, Seattle, Dallas/Fort Worth, New Mexico and OCEESA. The total membership is around 10,000 nationwide.

2004 Asian American Engineer

Each year, during the week of Washington's birthday (February 22), the entire nation celebrates National Engineers Week to recognize the achievements of engineers and their contribution to improvements to the quality of life. One important element of the National Engineers Week is the Asian American Engineer of the Year (AAEYO) Award. CIE/USA has organized and hosted the Asian American Engineer of the Year Award since 2002. Year 2004's AAEYO award banquet, held on February 28, 2004 at Santa Clara, California, was organized by CIE/USA's San Francisco Chapter. More than 600 guests attended the award banquet. Mr. Hank Queen, VP of Engineering and Manufacturing of Boeing Commercial Airplanes, was the keynote speaker for the award banquet.

The award banquet honored sixteen outstanding Asian American engineers throughout the United States, including the Distinguished Science and Technology Award to Dr. Steven Chu, the 1997 Nobel Laureate in Physics, the Distinguished Life Time Achievement Award to Professor Yuan-Cheng Fung for his pioneering work in bio-engineering, and the Engineer of the Year Awards to Mr. Y. C. Yang, Mr. Ravi Arimilli, Dr. Tze-Yao Chu, Mr. Viet Nguyen, Dr. Er-Ping Chen, Mr. S. K. Gupta, Dr. Wu-Chun Feng, Dr. Shreekant Agrawal, Dr. Li Fung Chang, Mr. Lawrence Dong, Ms. Heidi Shyu, Dr. Man-Chung Tang, Dr. William C. Lin, and Dr. Tuchih Tsai.

2004 AAEYO Award recipients and selection committee chairmaa, Professor Tai-Ran Hsu, at a reception party

Executive Director of National E-Week, delivering a message from President George W. Bush

Mr. Sean Liu, Commissioner, President's Advisory Commission on Asian Americans and Pacific Islanders, delivering a message from California Governor Arnold Schwarzenegger

AAE0Y Executive Chair, Dr. David Fong, delivering an opening speech

AAE0Y Honorary Chair, Professor Belle Wei, delivering an opening speech

CIE/USA National Council Chairman, Dr. Barry Lin, delivering an opening speech

CIE/USA's advisor, Mr. Y. C. Yang, accepts his AAE0Y award
The Dallas/Fort Worth chapter of CIE (CIE/USA-DFW, www.cie-dfw.org) was established in January 1989. We share the same basic objectives of other CIE/USA area chapters in promoting communication and information exchange among engineers of all disciplines. In 2003, CIE-DFW was selected as the DCCC (Dallas Chinese Community Center) DFW "Spirit of Community Service Award" winner.

The CIE/USA-DFW Annual Convention As always, this is the most important event of the year with an estimated attendance of 600 people, including local celebrities and executives of multinational high-tech corporations. Throughout the years, we have been very fortunate to have the participation of keynote speakers who are well recognized for their leadership in business, academia and government. The keynote speaker for the 2003 annual convention "Global Transformation" was Mr. William Swanson, Chief Executive Officer and President of Raytheon Company.

Youth Program We believe that youth is the hope for our future, and good education is the foundation for successful engineers and citizens.

Over the years, we have developed a series of annual activities for youth development. These events include MathComp/MathFun, Young Achiever Awards, Essay Writing Contests, and Speech Contests with support from Major local businesses, schools and universities.

Every year, more than 1000 young adults participate in the competitions, and winners are recognized at the annual convention. Starting in 2001, CIE-DFW worked with the McNabb program to extend our MathComp scope for students from grade one through twelve. The partnership also allowed us to penetrate the local independent school districts to reach a broader range of students. We have also expanded into other well-established organizations such as Junior Achievement. For the continuation of future leadership development and membership, we are also focusing our efforts on young professionals and new college graduates. This will support our effort to build leaders for the future.

Leadership Assessment and Mentoring Program (LAMP) The purpose of LAMP is to help Asian Americans achieve their full potential by addressing the needs and opportunities for professional growth. The program is currently organized by CIE/USA-DFW and sponsored by Raytheon Company. In May of 2003, we held the "Inspiration, Knowledge, Skills - A Leadership Workshop" seminar that was developed in partnership with Raytheon. In addition to two lectures, "Powerful Presentations and Beyond" and "Perpetual Pursuit of Excellence", LAMP assembled a panel to discuss the fundamentals of the U.S. Government. Panelists represented the three levels and the three branches of U.S. Government, news media, and the League of Women Voters.
Worth Chapter

Monthly Technical Seminars  As the most active and influential engineering organization in the DFW area, we provide services to both professional societies and local communities. We frequently offer seminar programs in the areas of telecommunications, microelectronics, information technology, biotechnology and business management. These programs provide a variety of in-depth knowledge and insight. The five "Career Assessment for Professional" seminars in 2003 received extremely positive and encouraging feedback.

New events with academics and mainstream organizations CIE/USA-DFW co-sponsored an Entrepreneur Workshop in January with the MIT Forum, IEEE, and UTD. The event set a new milestone for CIE's outreach program with local and world-class organizations.

In February, CIE/USA-DFW once again hosted the Asian American Engineer of The Year Award Banquet. The banquet honored seventeen outstanding Asian American engineers throughout the United States, including Dr. Samuel Ting, the 1976 Nobel Laureate in Physics, and Dr. Chih-tang Sah, the Pitman Eminent Scholar Professor in Electrical & Computer Engineering at the University of Florida. "The New Faces of Engineering" is a new National Engineers Week program spotlighting the incredible contributions of America's young engineers.

Officer Training  We understand the importance of passing down CIE knowledge and tradition during the transition from one year's leaders to the next. At the end of every year we gather the board of directors, new officers, and convention committee members for a day of orientation. Orientation includes guidance and support from CIE's leaders: a senior advisor provides an inspirational speech, the current president reviews the activity report, and the new president sets goals and expectations for the coming year. At the end of orientation, the entire team participates in activities to examine important issues concerning the future of the organization.
As the founding organization of CIE-USA before the National Council was established, the primary objectives of Chinese Institute of Engineers-USA Greater New York Chapter (CIE-USA/GNYC) are to promote the well-being of the Chinese engineering community in the United States and abroad, and to enhance networking and communications among engineers and scientists. The 2003 Chapter activities are highlighted below:

### 2003 CIE-USA/GNYC Annual Convention and Activities

The annual convention was held on September 27, 2003 at Newark Airport Marriott. The theme was "Technology Alliance and Global Business Opportunities." Dr. Chun-Yen Chang, President of National Chiao Tung University, Taiwan, ROC was the dinner banquet keynote speaker. His speech title was on "Strive for the Center of Excellence." The luncheon keynote speaker was Professor Jin Wu (Former Minister of Education of Taiwan and President of Cheng Kung University) of Cheng Kung University. He addressed on "Blending Cultures of the East and the West-My Working Experience." There had been more than 30 speakers to cover one plenary session and six parallel sessions to address the issues and progress on biotechnology/pharmaceuticals, bio-business, Chinese computing technology and education, system-on-chip (SoC) and nanotechnology, the future of IT industry, and humanity: sharing of mainstream experience. One of the plenary session speakers, Dr. Edwards Cheng, a senior NASA consultant, presented his expertise: "The Accomplishments and Legacy of the Hubble Space Telescope". Other plenary session speakers were Mr. Edward Yang (VP of Technology, Hewlett-Packard Company), who gave a talk on "Industry Changes and Leadership" and Professor David Shaw of State University of NY at Buffalo, who addressed on "The Art of Emerging Industrial Revolution". In the award ceremony, both Drs. Jin Wu and Chun-Yen Chang were the recipients of the CIE Distinguished Service Award. Dr. Edward Cheng, Mr. Edward Yang and Dr. David Shaw were the recipients of Distinguished Achievement Award. Dr. Ted Lee, former CIE chapter president, was the recipient of the Institute Service Award. In addition, there were 12 high school scholarship recipients who showed their interest to continue their studies in science and engineering.

#### Below are our 2002 Chapter Activities:

- April 5 and 8, 2003, Mr. Paul Wong, TAITIP, gave a seminar on "The New Opportunities in Taiwan for US IC-Design Professionals and Entrepreneurs"
- May 31, 2003, Dr. Joyce Huang presented a seminar on "The Strategies of Personal Finance Planning".
- Two family-oriented events, a summer picnic in August and a year-end party in December had given members’ families to join our activities.
- CIE-GNYC had actively participated in the cross-organizational events with other societies and also encouraged its members to join in the mainstream activities.

### 2003 Wireless and Optical Communications Conference (WOCC)
- 2003 Biotechnologies and Pharmaceuticals Conference (Bio/Pharm 2003)
- 2003 Emerging Information Technology Conference (EITC)
Several mayors and elected officers of NJ towns shared their mainstream experience with audiences during the 2003 convention.

Wen Lin (left) and Frank Cheng (right) with the 2003 Convention Award Recipients, Professor Jin Wu, Professor Chun-Yen Chang, Dr. Ted Lee, Mr. Edward Yang and Professor David Shaw.

Annual Convention Graduate Student Thesis Contest Winners

CIE-USA/GNYC participated in the farewell party for Ambassador Zhang.

The audiences listened to the speeches of the Plenary Session of the 2003 Convention

Welcome Banquet for Mr. Zhang Jianguo, Deputy Director - General, State Administration of Foreign Experts Affairs, PRC on July 28, 2003
Chinese engineers in the San Francisco Bay Area have played a significant role in the rapid growth of technology. In response to the need to promote better communication and organization among Chinese engineers in the Bay Area, the San Francisco Bay Area Chapter (the Chapter) was founded in April 1979. From an initial membership of 40 members, the Chapter has grown to 900 members, 200 of which are permanent members.

Talent Show (Aug. 2, 2003)
CIE-SF held its Second Annual Talent Show on August 2, 2003 at the Chinese Culture Center in Sunnyvale, CA. About 80 attendees came to watch twenty performances for the evening. Members and friends displayed their talents in a variety of performing styles. Programs included piano, ballet, Chinese dance, guitar instrument, solo and duet, art songs, hammered dulcimer, and Chinese folk narration.

A number of journalists came. World Journal's Debra Yang reported the event in the newspaper the next day. All of the programs performed were quite captivating. The fun evening was concluded with a prize drawing. CIE Board members donated the prizes for drawing.

CIE-SF concluded the IC design courses with an appreciation dinner for Teachers and Students on Friday 12/5/03. CIE-SF EEECS group organized the "IC design short course" together with co-sponsorship from the San Jose State University from 9/27 to 11/15. It received an overwhelming response from the Bay area engineering community. This opens a new era for the CIE-SF chapter. The short course include the following classes:

1. Network Processing ICs, 9/27, by Broadcom 郑春三博士主講
2. IEEE 802.11 WLAN, 10/11, 由工研院電通所劉天佑博士主講
3. Introduction to Wireless RF Design, 10/18, 專Etc Corp. 王迎雪博士主講
4. Network Security ICs, 11/8, 由 Broadcom 金珉博士主講
5. Embedded SoC Design with ARM, 11/15, 由Hitachi Global Storage
   Technology 鄭佐明博士主講

MMT Group held a "MEMS & Bio MEMS Seminar and Panel Discussion" on 11/7/03.
Keynote Speaker: Prof. TR Hsu, SJSU, Invited Speaker: Prof. Liwei Lin, UCB Panelist: Prof. Hsu, Prof. Lin, Mr. Tom Chang, Dr. Eaden Saw, Dr. Ralph Lin

CE Group held a Golf Tournament on 8/16/03.
EPMC Group Dinner Seminar on "Wireless Communication-an Emerging Technology", presented by Dr. Frank Wu (CTO, USI) on 11/4/03

CIE 2004 Winter Conference and Asian American Engineer of the Year (AAEOY) award banquet was held on Feb. 28, 2004 at Santa Clara Marriott Hotel. The afternoon technical session's topics covered "Taiwan at Crossroad-Challenges & Opportunities" and "China under Construction-Now & Beyond".
2003 CIE-SF 2nd Talent Show
Hawaii Dance - Jessica Chan & Abby Chen

2003 President Dr. David Fong gave the opening speech

Audience Listen to Dr. Tom Campbell, Dean of Haas Business School, UC Berkeley

2004 AAE/OY Award Recipients

Keynote speaker, Dr. Campbell, 2003 Chairman Dr. Barry Lin and Scholarship recipients

2003 National Council Chair Dr. Barry Lin, 2003 CIE-SF President Dr. David Fong and other CIE-SF members sang the "National Anthem" in the 2004 AAE/OY Award Ceremony.
Seattle

Society of Chinese Engineers of Seattle (SCES), a non-profit and non-political professional organization, was founded in 1961. After years of growth, in 1988, the Society joined the CIE/USA organization as a Seattle Chapter (CIE/USA - SEA). Our members come from aerospace, biomedical, business, software, telecommunications, environmental and other professions. Over the years, the CIE/USA- SEA has established as the one of the leading local professional organization in the Great Puget Sound Asian American communities.

The missions of the society are:
1. To promote technical and professional excellence and to provide benefits for members.
2. To provide technical, professional and culture services to our communities.
3. To serve as a conduit to the Institute at the national and international levels.

APA Science, Engineering, Technology Scholarship Award
We initiated the First Annual APA Science, Engineering and Technology Scholarship Award Program in 2003. The award winners are:

- a. 1st graders to 6th graders: Jessica Guo, Diana Hu
- b. 7th graders to 9th graders: Willy Hu, Bolun Du
- c. 10th graders to 12th graders: Clayton Chang, Jonathan Hsieh
- d. Undergraduate College: Jerry Fu, Stephanie Suzuki

http://www.cie-sea.org

Scholarship chair: Jiin Chen (L) and award winners
Chapter

Spring Conference

The Spring Conference is held on April 5, 2003, e-VOLUTION: Pushing the Frontiers of eBusiness Technology

Special Feature Speech:

- "Microsoft Business Framework" by Dr. Dr. Adam Yeh, Microsoft
- "The Evolution of Markup Technologies" by Scott Tsao, Boeing
- "The UNCEFACT "Core Components" by Sally Chan, Boeing
- "ebXML and the e-Business Protocol Stack" by John Yunker, Amazon.com
- "e-Business Enterprise Infrastructure Design and Implementation" by Jason Ma, Microsoft

Community Activities

CIE/USA-Seattle and National Taiwan University Alumni Association (NTUAA) formed a joint walk team to support 13th Annual Walk For Rice. Also in the networking with communities, we have a joint picnic in the summer 2003 with four Chinese American organizations. The picnic has about 400 persons joined.

2003 Annual Convention

The Convention was held at the Hilton Seattle Airport & Conference Center on October 4th. The theme of the Convention is "Technology without Borders".
Keynote Speech "Global Enterprise and Partnership with China" Dr. David Wang, President, Boeing China Inc.

Technical Conference

- "SARS, Genome Sciences and Biotech in Future China" Dr. Jun Yu, Professor and Associate Director of Beijing Genomics Institute
- "Transportation's Role in Redevelopment - The South Lake Union Story" Mr. Anthony Lo, Lead Transportation Engineer, Parsons Brinckerhoff Inc.
- "Web Service and Service-Oriented Architecture (SOA) - Next Generation Business Application Architecture" Mr. Hong-Lee Yu, Senior Development Manager, Modeling, Rational, IBM
- "Microsoft in China: Challenges and Opportunities" Mr. Bill Luan, Program Manager, Windows Deployment, Microsoft Corp.
Board members:
Lee Shyr (President),
Su-Fun Chen (Vice-President),
Peter W. Deng (Secretary),
Han-Min Chang (Treasurer),
James Z. Chen, Srin-Wing Gohard,
Gang Hou, Shiow-Ching Hou,
Chung-Chieng Lai, Kien-Yin Lee,
Julia Jin, Frank Hung.

Specialty group leaders:
Bio- Zhiyuan Shen
Nano- Wei Pan, Eliot Fang
IT- Yiming Chen, Meifan Chen,

Advisors:
Chui Fan Cheng
Tang-Tat Ng

The ACES-NM greeted 2003 summer with a BBQ party and a seminar on "Identity Theft". Dr. Martin Dean Moore from Sandia National Laboratories (SNL) shared with us his professional knowledge on how to identify and protect ourselves from "Identity Theft". Dr. Moore's personal experience as a victim of identity theft made us even more realized how easy it is for anyone to become a criminal's target and how important it is to protect ourselves.

Following our summer activities we held a "Water Resource Seminar" in early fall to learn about the water resource situation in New Mexico. Dr. Belling Liu from New Mexico Interstate Stream Commission presented us an overview of the Pecos River Decision Support System. Mr. Jeff Peterson, a water resource project manager from New Mexico Bernalillo County Infrastructure Planning and Geo-resource Department, also shared with us the results of the East Mountain Area water resource investigations and regional water planning for complex hydrologic setting. We also had Dr. Dick Thomas from SNL Critical Infrastructure Security organization to talk about the Water Model in China.

To enable our members to share and learn more about emergent science and technology, the ACES-NM formed three specialty groups in the winter of 2003. They are bio, nano, and IT groups. The bio specialty group jump-started members' interests and learning experiences by inviting Dr. Cao Hong from Los Alamos National Laboratory's Center for Human Genome Studies to talk about "Understanding the Human Genome Project." Dr. Cliff Han from the same Center also enlightened us on the technologies behind the Human Genome Project.

Our nano specialty group also organized a "News from the Nano Front" seminar in January 2004. Dr. Jun Liu from SNL Chemical Synthesis and Nanomaterials Department shared with us how his group has learned from biology to discover new approaches to create nano-scale materials. Dr. Shawn-Yu Lin from SNL Photonic Research Department also came to share with us his group's newest findings on a new class of light emitter, which is made possible by creating a 3-D metallic nanostructure photonic crystal.

In late March we will have a spring party in which our members and their families will join together to play tennis and soccer. Following the spring party will be our annual meeting in mid April. We will elect new board members and present scholarship awards at the meeting. In addition, we will have a speaker from Intel to discuss with our project management in the global business environment. Professor Steve Walsh from University of New Mexico will also come to share with us his perspectives on the commercialization of nanotechnology. An expert from LANL will give a talk on biotechnology.

The ACES-NM board and our specialty groups leaders would like to thank our members for their strong support in the past year. Only with our members' candid input and active participation we were able to deliver so many successful events. We also thank our speakers for taking their times to share with us their professional knowledge and area-of-expertise.
OCEESA 2003 Activities

1. Houston Conference:
   September 5 and 6, 2003

For the first time, OCEESA teamed up with the mainstream society to host an environmental conference in Houston, Texas on September 5 and 6 of 2003. Over 250 attendees witnessed the overwhelmingly successful event.

Three distinct forums were offered in the conference. In the Industrial Forum, topics ranged from wood waste recycling to recycling and mining C&D waste were covered. In the Government Forum, speakers from various governmental entities lectured on clean fuels, air quality, wastewater processing and policies relating to waste disposal and treatment in Taiwan. In the Innovation Forum, topics such as water and sewer infrastructure rehabilitation, sediment and erosion control, and environmental venture capital were discussed.

During the luncheon, Gordon Quan, Council Member and Mayor Pro-Tem of the City of Houston, delivered his welcome remarks. Commissioner Ralph Marquez of the Texas Commission on Environmental Quality was the keynote speaker.

During the award ceremony, OCEESA presented the Environmental Leadership Award to Mr. Lee P. Brown, Mayor of the City of Houston. Mayor Brown was honored for his environmental leadership and vision.

After the conference, more than 70 conference attendees took advantage of a tour featuring the City of Houston's Westpark Consumer Recycling Center and Restore, and Environmental Service Center.

2. OCEESA Albany (New York) Chapter

OCEESA Executive Director, Professor Yung-Tse Hung, visited OCEESA Albany (New York) Chapter area in 2003. Professor Hung had a chance to meet with OCEESA Albany Chapter President, Professor Ernest Siew, and other OCEESA local members. During the luncheon meeting, Professor Hung reported OCEESA activities and business.
